Quality Control

We check the parameters of raw materials as per our specifications. We consider the source, reliability of supplier in meeting our declared supply dates. We also have quality control checks in place for work in progress, finished products, packaging and storage.

We work closely with the Kenya Bureau of Standards in regard to standards for the various products we manufacture. We also verify with our suppliers the level of environment friendliness and biodegradability of the raw materials produced.

Innovative Proposals

We conduct regular free in house seminars where by we train our customer's operatives in Laundries, Housekeeping, Food Hygiene and other topics related to cleaning and hygiene. This allows our clients to understand the proper use age of our products, cost saving methods, efficiency and organized workflow aspects. Feedback from our customers indicated that our training seminars have been very effective, timely and successful. Our field staff regularly visits customers on site to find out their feelings about our service delivery and periodic calls are made to monitor specific aspects of the quality service rendered and to gauge customer satisfaction levels.
